FABRICS

Fabric selection is fundamental for the design procedure of our garments. Most of the technical fabrics we use are Italian-made and offer their best during cycling performance.

 <p>FEATURES:</p> <ul style="list-style-type: none"> Anti - Odor Breathable 4 way stretch Non-see Through Abrasion resistant 	<p>POWER</p> <p>The strength points of the POWER performance technology are the four ways stretch and the abrasion resistance, along with outstanding wicking properties and breathability. Warp-knit technology allows to create fabrics with excellent density that follow muscles during the performance and get back into shape after use.</p>
 <p>FEATURES:</p> <ul style="list-style-type: none"> 4 way stretch Breathable Rapid dry Non-see Through UVupf Lightness 	<p>FRESH FEEL</p> <p>All the hydrophilic fabrics of both polyester/ea and nylon/ea composition, light weight and high breathable by composition and knitting structures, have the FRESHFEEL technology that ensures a cooling effect and quick dry features suitable for summer training and performance in hottest conditions.</p>
 <p>FEATURES:</p> <ul style="list-style-type: none"> 4 way stretch Breathable Abrasion resistant Non-see Through UVupf 	<p>HIGH RES</p> <p>The HIGH RESOLUTION technology is the latest development in the preparation of fabrics specifically engineered by M.I.T.I. for sublimation print. Deeper penetration of the inks into the fabrics, reduced grind through of white in the fabric when stretched and higher level of opacity of the prints.</p>
 <p>FEATURES:</p> <ul style="list-style-type: none"> 4 way stretch Breathable Abrasion resistant Water Resistant UVupf Wind control 	<p>THERMAL</p> <p>THERMAL technology is developed on four ways stretch brushed fabrics, with amazing abrasion resistance, outstanding recovery and easy care. The knitting construction along with the brushed skin side gives insulation benefits uncommon for the performance stretch fabrics. Heavy weight and thickness allow this technology to be applied on almost all the outdoor activities garments.</p>
 <p>FEATURES:</p> <ul style="list-style-type: none"> 4 way stretch Abrasion resistant Breathable Lightness Waterproof Wind control 	<p>ZERO WIND</p> <p>Hydrophilic membrane, ZERO WIND is a non microporous autentic barrier against the atmospheric agents like wind and rain, with a dynamic breathability. It guarantees an osmotic trasmission of sweat from the warm inside to the cold outside. The more intense is the physical activity the more breathable becomes the membrane.</p>
 <p>FEATURES:</p> <ul style="list-style-type: none"> Anti - Odor Breathable 4 way stretch Non-see Through Abrasion resistant 	<p>THUNDERBIKE POWER</p> <p>THUNDERBIKE POWER is a high-tech fabric produced with a special elastomer that ensure amazing abrasion resistance and outstanding recovery. It provides also a perfect comfort fit and high pilling and abrasion resistance.</p>
 <p>FEATURES:</p> <ul style="list-style-type: none"> 4 way stretch Insulating Waterproof Breathable Wind control 	<p>STORM SHIELD</p> <p>The best of Windtex, with a plus. STORM SHIELD is a fabric born out of the consolidated experience of Vagotex SpA in the field of technical fabrics for sports always with an extra eye on high-quality leisure time. It prevents warmth dispersion, allows your skin breathe freely and protects you from the weather at the same time.</p>
 <p>FEATURES:</p> <ul style="list-style-type: none"> Insulating Water Resistant Breathable Wind control 	<p>WINDTEX SHIELD</p> <p>WINDTEX SHIELD fabric, introduced by Vagotex SpA, is made to give a complete protection from the wind, assuring an high protection and an excellent comfort. With its water repellent tratment it guarantees a protection from the rain, keeping the body dry during the ride.</p>

 <p>FEATURES:</p> <div>  Waterproof  Insulating </div> <div>  Breathable  Wind control </div>	<p>WINDTEX</p> <p>The WINDTEX fabric protects the cyclist from wind, cold and rain and keeps the body in a comfortable internal microclimate. It guarantees high level of protection from atmospheric agents while offering the utmost comfort thanks to its transpiration property. Via an osmosis process, the membrane manages to expel the excess dampness that is produced during sporting activities, and consequently curbs the annoying effect of internal heating.</p>
 <p>FEATURES:</p> <div>  Water Resistant  Breathable  Lightness </div> <div>  Packable  Comfortable  Insulating </div>	<p>PRIMALOFT</p> <p>PRIMALOFT fabric keeps you warmth without being bulky. It is very light and breathable, and its composition makes it water resistant and easy to pack. Incredibly comfortable due to its surprisingly softness and strength, its innovative structure rapidly wicks away humidity, offering great comfort and excellent thermal insulation.</p>
 <p>FEATURES:</p> <div>  4 way stretch  Breathable  Raw cut </div> <div>  Non-sep Through  UVupf </div>	<p>RACE ON</p> <p>RACE ON fabric guarantees muscular support which reduces muscle vibration and fatigue, thus improving the athlete's performance. Comfort and freedom of movements rise up due to the Raw Cut technology, and the particular construction of this fabric ensures a cooling effect and quick dry features during summer cycling performances.</p>
 <p>FEATURES:</p> <div>  4 way stretch  Breathable  Lightness </div> <div>  Comfortable  Perfect fit  Rapid dry </div>	<p>HYDRO COOL</p> <p>Perspiration generates moisture on the skin. HYDRO COOL fabric absorbs this moisture and quickly transports it to the fabric face. The optimised fibre ensures a constant evaporation and makes heat exchange more effective, thus producing a cooling effect on the skin.</p>
 <p>FEATURES:</p> <div>  4 way stretch  Breathable  Insulating </div> <div>  Comfortable  Rapid dry  UVupf </div>	<p>MODULO 200 RAPID DRY</p> <p>Incredibly comfortable fabric, due to its surprisingly softness and strength. MODULO 200 it's a particular suitable fabric for active sports. Its innovative structure rapidly wicks away humidity, offering great comfort and excellent thermal insulation.</p>
 <p>FEATURES:</p> <div>  Comfortable  Breathable  Insulating </div> <div>  Rapid dry  UVupf </div>	<p>THINK 44 THERMAL</p> <p>Italian engineered stretch fabric created for high performance sport apparel. Due to its composition the fabric performances are breathability, thermal insulation and elasticity.</p>
 <p>FEATURES:</p> <div>  Lightness  Breathable </div> <div>  Insulating  Wind control </div>	<p>RESPIRA WIND OUT</p> <p>The particular molecular constitution of this membrane absorbs the sweat generated by the body and transports it away where it evaporates, creating a microclimate between the membrane and the dermis always dry and at a constant temperature. Besides its excellent breathability, this material features exceptional lightweight and windproof properties making it suitable for the construction of jackets and vests.</p>
 <p>FEATURES:</p> <div>  Comfortable  Breathable </div> <div>  Rapid dry  UVupf </div>	<p>TECNO 3D</p> <p>Fabric TECNO-3D is made in highly breathable antibacterial light polyester. Thanks to its open cellule construction transports away body perspiration providing a faster evaporation. Indeed its particular conformation 3D increases comfort feeling helping air transit during sport.</p>

PADS ANATOMIC 3D DESIGN

We work side by side with the best pad companies in the Italian and foreign sector to offer products that meet all the athlete needs on the bike while guaranteeing high standards of quality and protection on the saddle.

MEN'S PADS

cod. P1

DISTANCE MEDIUM LONG

WOMEN'S PADS

cod. PW1

DISTANCE MEDIUM LONG

POWER PLUS

Design to offer best results on protection, support and comfort on road bike and mtb during medium distances. Made using high quality microfiber fabric, with antibacterial properties and great elasticity, this pad is also incredibly soft to the touch and breathable.

- > elastic, it follows pedalling movements
- > anti-bacterial protection
- > optimal moisture transfer
- > Ideal both on the road and on a mountain bike

cod. P5

EnerDryPad
The Pad's EVOLUTION

DISTANCE MEDIUM LONG

cod. PW5

EnerDryPad
The Pad's EVOLUTION

DISTANCE MEDIUM LONG

PARIGI

Pad with variable density: greater in the ischial zone and perineal support on the saddle while the front is discharged offering magnificent comfort where necessary and appropriate protection. The pad Parigi was developed with professional cyclists and is excellent for medium-long distances. The soft fabric and the enveloping anatomical fit and the absence of seams eliminate frictions.

- > differentiated thicknesses due to the different protection needs of the area
- > surface with antibacterial yarn
- > perforated foams for excellent breathability
- > ideal for medium-long distance rides

cod. P2

EnerDryPad
The Pad's EVOLUTION

DISTANCE MEDIUM LONG

cod. PW2

EnerDryPad
The Pad's EVOLUTION

DISTANCE MEDIUM LONG

BREST

New high performance pad, ideal for long hours in the saddle thanks to the gel inserts that absorb the vibrations coming from the road. Made externally with a smooth fabric that gives a pleasant sensation on the skin and with antibacterial yarn, the pad has perforated foams that quickly carry moisture to the outside. It has also been created with minimum thickness avoiding any friction, and its wraparound construction adheres to the body and allows the bottom to stay in place without moving.

- > gel inserts for greater protection against road imperfections
- > surface with antibacterial yarn
- > perforated foams for excellent breathability
- > ideal for long distance rides

cod. P3:

DOLOMITI pads

DISTANCE MEDIUM LONG

cod. PW3:

DOLOMITI pads

DISTANCE MEDIUM LONG

VUELTA+

A "multilevel" men's pad, it is created from different materials and moulded into a particularly anatomical shape so as to offer maximum comfort.

- > breathable thanks to the use of perforated foam
- > elastic, it follows pedalling movements
- > anti-bacterial protection thanks to Silver dry fabric
- > anti-shock silicon inserts in points under the greatest pressure
- > optimal moisture transfer
- > ideal for long distances both on the road and on a mountain bike

cod. P4

DISTANCE MEDIUM LONG

cod. PW4

DISTANCE MEDIUM LONG

ROAD PERFORMANCE SPACE

Long distance pad featuring different foam combinations and varied densities, delivering superior perineal support and increasing protection along the pelvic track. Seamless structure for best comfort.

This construction allows for best protection and flexibility with a slim profile and greater stability in saddle.

PADS ANATOMIC 3D DESIGN

KID'S PADS

cod. FK1

DISTANCE  MEDIUM LONG

EnerDryPad
The Pad's EVOLUTION

AGILE

Bi-elastic pad with anti-bacterial external fabric treated with silver ions. A good density fabric in the interior ensures optimal comfort in addition to rapidly absorbing moisture and carrying it outside, thus preventing the formation of unpleasant irritations.

- > very breathable
- > elastic, it follows pedalling movements
- > anti-bacterial protection
- > varied foam thickness offers greater comfort during cycling
- > optimal moisture transfer
- > ideal for medium distances both on the road and on a mountain bike

cod. F9

DISTANCE  MEDIUM LONG

EnerDryPad
The Pad's EVOLUTION

Air Dry Pad
The Pad's EVOLUTION

ENERDRY AIR DRY PAD

New pad made using «intelligent» Enerdry Air Dry chamois, which perfectly interacts with the body providing maximum thermo physiological comfort. Plenty of padding but very slim to avoid chafing on the run, the Enerdry Air features perforated foam for maximum breathability and fast dry.

- > Elastic mesh ensures maximum moisture transport and fast dry, specifically designed for triathletes.
- > Last generation yarn treated with Bio-Ceramic material, resistant even after several washes
- > High thermal insulation thanks to bio-ceramic fibers that insulate from the cold or excess heat.
- > Hypoallergenic and with permanent ionic action which prevents the proliferation of bacterias
- > Elastic, the fabric ensures a snug fit to the morphology of the body
- > Perforated foam for added breathability

Specific for TRIATHLON

COLOURS OF YOUR TEAM

COLOURS MAP

Before choosing the colours for your new equipment, we suggest you to pay attention to the colour of summer and winter trousers because the fabric of the internal area has already coloured. This option favours better performance during use but it is necessary paying a special attention when choosing the colour of the jersey. In the following you will find the available colours for trousers internal area.

J102	J103	J104	J105	J106	J107
BLACK	ROYAL	BLU NAVY	LYCRA RED	LYCRA GRAY	LYCRA LIGHT BLUE

After choosing the main colour for your trousers, you can decide the colours for your jersey and for the panels of your trousers.

PRINTABLE COLORS MAP

All our printing technology is digital therefore there is no limit to the number of colours we can use without increasing the price. Below here you will find a list with main colours available. You can also ask about other colours but we inform you production could be longer.

J110	J111	J112	J113	J114	J115	J116	J117
YELLOW	DARK YELLOW	LIGHT ORANGE	DARK ORANGE	DARK RED	LIGHT PINK	PINK	FUXIA
J118	J119	J120	J121	J122	J123	J124	J125
LIGHT PURPLE	PURPLE	DARK PURPLE	ACID GREEN	LIGHT GREEN	GREEN	AQUA GREEN	LIGHT BLUE
J126	J127	J128	J129	J130			
MEDIUM BLUE	BLUE	LIGHT GRAY	GRAY	MEDIUM GRAY			

We stress as well that every fabric absorbs colour in a different way during the heat transfer stage so it could happen the same colour adopts lightly different tonalities.

In addition to the traditional colours, fluorescents are also available. Please contact your sales representative in case you want to colour your uniform using these new tonalities.

NOTE: During production the colours in the graphic draft can vary due to chemical process, materials, colour content, printing methods...

SHORT-SLEEVED JERSEYS

Cod. W0800 PROFI XP Short-sleeved jersey

The Profi XP jersey is the model created for the professional teams. A top jersey for high level cycling and designed to obtain the best results in terms of aerodynamics and comfort. A garment that fits like a glove with very tight sizing and finished with free cut longer raglan sleeves.

- The key features of this garment are:
- Race on elastic fabric on the front and back
 - 4-way stretch and raw cut sleeves for all day comfort and performance
 - Elastic, light and fast-wicking micro-mesh, strategically positioned to improve moisture management
 - Inside silicone strip on the back bottom which keeps the jersey in place
 - Angled pocket for easy access
 - Ultraviolet protection factor 30
 - Z5 – full-length concealed YKK zip
 - T1 – 3 vertical drop cargo pockets at the rear

OPTIONS:
T8 – 3 vertical drop cargo pockets on the back and one lateral zipped pocket on the right
A1 – Reflective elements

FABRIC	CTA	FIT	GENDER
RACE ON	+20°C	EXTRA SLIM	MALE

The Air jersey offers maximum performance with the minimum possible weight. It presents a new ultra lightweight fabric that offers maximum transpiration with microperforated grid that guarantees optimal ventilation in the hottest days. This is reinforced with a fabric in the dorsal area that expels sweat out, set-in sleeves and minimum neckline. Perfect for cyclists with advanced level and thin build.

- The key features of this garment are:
- 4-way stretch and raw cut sleeves for all day comfort and performance
 - Elastic, light and fast-wicking micro-mesh, strategically positioned to improve moisture management
 - Hemmed neckline without collar
 - Inside silicone strip at the bottom which keeps the jersey in place
 - Angled pockets for easy access
 - Ultraviolet protection factor 15
 - Z5 – full-length concealed YKK zip
 - T1 – 3 vertical drop cargo pockets at the rear

OPTIONS:
T2 – 3 vertical drop cargo pockets on the back and one central zipped

Cod. W0480 AIR Short-sleeved jersey

Improved version of the historic Elite jersey, now lighter, more elastic and adaptable to the cyclist's body. It incorporates rib finish cuffs on the sleeves, reflective tab for greater visibility and anti-slip band to prevent the garment from moving during pedaling. Ideal for medium-high level cyclists.

- The key features of this garment are:
- Front and sides Hydro cool elastic fabric to improve moisture management
 - Tough rear fabric to bear the weight of the pockets when full
 - Sleeve band gripper elastic for increased comfort
 - Inside silicone strip on the front bottom which keeps the jersey in place
 - Elastic band with silicone on the back bottom for increased comfort
 - Flatlock seams for extra comfort next to skin
 - Reflective stripe under the pockets

PROMOTIONAL KIT

Cod. W2754 SLIMBER Light quilted jacket

The SLIMBER quilted jacket with hood is a perfect model for spring/autumn use and not extremely cold winter days. It is made entirely of lined windproof quilted fabric with a very technical synthetic feather called PRIMALOFT® inside. The characteristics of this latest generation material are lightness, thermal protection and comfort in use and washing. The product also features inserts of CORDURA fabric on the shoulders, very resistant to pilling and abrasion. The jacket is customizable in digital print on the front and back in the central part as well as on the sides.

- The key features of this garment are:
- Reverse front zip
 - Double garage zip protection
 - 1 small chest pocket
 - 2 large front pockets
 - Protective hood to protect from the cold
 - Elasticated sleeve cuffs

Also available in Red and Royal colors

SIZE CHART

Man sizes

We have improved our table for fit thanks to an in-depth collaboration with both professional and amateur cyclists so as to cope the preferences in each cycling category. In the list below you will find the correspondence between European measurements and Italians.

We remind you that the following list is a mere indication since each category is ruled by different requirements and preferences. The measurements here below are valid for fitting slim and regular; for the extra slim it's better to fit samples. The measurements here below are valid for fitting slim and regular; for the extra slim it's better to fit samples. Therefore we suggest you to ask to our area agent for any further information.

SLIM & REGULAR	SIZES		XXS	XS	S	M	L	XL	XXL	XXXL	4XL	5XL
			42	44	46	48	50	52	54	56	58	60

Woman sizes

Bicycle Line produces different garments to match every woman need. We designed figure-hugging cycling wear, specifically dedicated to sport women. In the list below you will find the correspondence between European measurements and Italians.

If your team has less than 10 feminine members (minimum quantity for an order) we suggest you to choose a standard garments for man bearing the fact that a man S size corresponds to a woman M size in mind.

The measurements here below are valid for fitting slim and regular; for the extra slim it's better to fit samples. Therefore we suggest you to ask to our area agent for any further information.

SIZE CHART

Gloves

To find out your glove size, measure around the widest part of the hand with a tape, usually around the knuckles. Do not include the thumb. You should use your dominant hand, the right if you are right-handed, and the left if you are left-handed.

SIZES			XS	S	M	L	XL	XXL
GLOVES	UNISEX	CM	17-18.3	18.3-20.2	20.2-22.2	22.2-24.5	24.5-26	26+
		INCH	6.7-7.2	7.2-7.9	7.9-8.7	8.7-9.6	9.6-10.2	10.2+

Socks

Use the table below to determine what size of socks you need based on your shoe size. In the chart you will find both the European, UK and US sizes.

SIZES			XS	S	M	L
SOCKS	UNISEX	EU	35-37	38-40	41-43	44-46
		UK	2.5-4.5	5-6.5	7-9	9.5-11
		US	4-5.5	5.5-7	7.5-9.5	10-11.5

Overshoes

With this table you can easily find what size of shoe covers you need based on your shoe size. In the chart you will find both the European, UK and US sizes.

SIZES		S	M	L	XL	XXL
OVERSHOES	EU	38-39	40-42	43-44	45-46	47-48
	UK	5-6	6.5-8	9-9.5	10.5-11.5	12-13
	US	5.5-6.5	7-8.5	9.5-10	11-12	13-13.5

GARMENT CARE

Our garments have been made using high-quality Italian-made fabrics. Pay close attention to wear washing temperature which clearly indicated in the label.

- Wash cycling garments separately from other clothes/accessories to prevent friction and/or colour migration
- Machine-wash is possible but always use a delicate cycle and lukewarm water (max. 30° C). Use a mild liquid detergent only and do not use softeners
- If hand washing: do not leave garments in water to soak. To remove excess water gently squeeze by hand.
- If you make use of washing machine do not spin and do not tumble dry
- After washing do not hang the garments in the direct sunlight. Dry garments flat or hanging.
- Do not iron.
- After each ride never store damp clothes in a non-ventilated environment (e.g. plastic bags, sport bags, suitcase, etc.).
- After each ride wash the garments immediately in order to avoid fabric deterioration caused by bacterial attacks.
- Massage oils and muscular-creams may damage the fabrics fibres.
- Do not use softeners or creams on any of our pads.
