MEN'S SHORT SLEEVED JERSEYS

W6006 ECHELON - Short-sleeved jersey - men's

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+18 / +35 °C

Engineered with elite-level competition and worn by our professional race teams. Smooth fabrics on front panels to reduce air resistance across a rider's frontal area. Textured back panel to reduce overall drag. Long sleeves to create aero efficiency. V-cut ergonomic seamless collar avoids irritation around the neck. Extended zip placket to protect your bib shorts when you're tucked tight in the drops.

Additional features:

- Ergonomic construction of the neck without seams and V-cut. In the rear part, raw cut shaped panel to increase aerodynamics
- Hidden divisible front zip with self-locking Cam lock slider with top and bottom fabric flap to prevent redness and frictions
- 3 capacious and elastic back pockets with shaped construction for easy access to essentials
- Internal reinforcement in the pocket to avoid breaks on sensitive points
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts
- Raw cut sleeves for improved comfort and performance

W6511 APEX - Short-sleeved jersey - men's

Fitting	■■■■■■■■■□
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+18 / +35 °C

Here's your cycling jersey to use during training rides in mild to warm weather conditions. Open-structured fabric to wick away sweat and promote breathability. Tight-knit fabric on the back for added sun protection. Raw-cut sleeves for an aerodynamic look.

Additional features:

- Lower collar construction for an optimal fit and seamless internal finish to avoid redness and frictions.
- 3 back pockets with inner elastic microfibre tape on the upper edge that makes the pockets safe and guarantees easy and comfortable access.
- Internal reinforcement in the pocket to avoid breaks on sensitive points
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts
- Hidden divisible front zip with top and bottom fabric flap to prevent redness and frictions
- Raw cut sleeves for improved comfort and performance

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

MEN'S SHORT SLEEVED JERSEYS

W6551 BASECAMP - Short-sleeved jersey - men's

Fitting	■ ■ ■ ■ □ □
Breathability	■ ■ ■ ■ ■ ■
Elasticity	■ ■ ■ ■ ■ ■
Temperature	+18 / +35 °C

This is your go-to jersey for training rides in mild to warm conditions. Open-structured fabric for sweat wicking and breathability. Close-knit fabric on the back for added sun protection. Raw cut sleeves for the aero look.

Additional features:

- Lower collar construction for an optimal fit and seamless internal finish to avoid redness
- Internal reinforcement in the pocket to avoid breaks on sensitive points
- 3 large back pockets with soft upper elastic band for easy access to essentials
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts
- Hidden divisible front zip with self-locking Cam & lock slider
- Intermediate sleeve length for a modern cycling
- Raw cut sleeves for improved comfort and performance

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

W6301 DRAFT - Short-sleeved jersey - men's

Fitting	■ ■ ■ ■ ■ ■
Breathability	■ ■ ■ ■ ■ ■
Elasticity	■ ■ ■ ■ ■ ■
Temperature	+18 / +35 °C

A cycling jersey to wear daily that sets the standard in terms of performance and value. Designed with stretch fabric to provide a snug yet non-restrictive fit. Comfortable and breathable when worn against the skin or over a sporty base layer. Strategically placed shoulder seams prevent fabric from bunching up under the arms.

Additional features:

- Internal reinforcement in the pocket to avoid breaks on sensitive points
- 3 large back pockets with soft upper elastic band for easy access to essentials
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts
- Hidden divisible front zip with self-locking Cam & lock slider
- Intermediate sleeve length for a modern cycling
- Set in raw cut sleeves for improved comfort and performance

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

MEN'S SHORT SLEEVED JERSEYS

W6521 APEX ULTRA - Midweight short-sleeved jersey - men's

Fitting	■■■■■□
Breathability	■■■■■■■■
Elasticity	■■■■■■■■
Temperature	+14 / +30 °C

Introducing the APEX Ultra: Elevated Performance and Comfort for Moderate Climates. Meticulously crafted from a mediumweight and breathable fabric, this jersey delivers optimal moisture management, ensuring your comfort even in the midst of challenging rides. Designed to fit close to the body while providing a relaxed feel, the APEX Ultra boasts an ergonomically cut collar that enhances comfort around the neck. The lightweight zipper allows for easy one-handed adjustments, ensuring a tailored fit while travelling.

Additional features:

- Ergonomic collar construction for an optimal fit and seamless internal finish, eliminating redness and friction
- Intermediate sleeve length for a modern cycling
- Inner elastic microfiber tape on the upper edge of the three back pockets, ensuring secure and easy access
- Internal reinforcement in the pockets to prevent wear and tear at sensitive points
- Internal silicone elastic waistband for a snug jersey-to-shorts fit
- Hidden divisible front zip with top and bottom fabric flap to prevent redness and frictions
- Raw-cut sleeves for enhanced comfort and performance
- Equipped with three expandable pockets, it ensures ample storage space for your essentials

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

MEN'S BIB SHORTS

W6005 ECHELON - Bib shorts - men's

Additional features:

- Minimal seams to increase comfort
- Ergonomic cut enhanced by the raw cut construction
- Ghost Air Gel pad for long distances. The cross-linked foams and injected gel inserts guarantee excellent comfort even after 7 hours. The front mesh insert guarantees appropriate breathability
- Customization: with 2 logos on lateral sides and 2 small logos on inner legs
- The leg bottoms with inner hypoallergenic silicone print provide a gripping function ensuring the leg bottom will remain in the right position

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+18 / +35 °C

Tested by our professional cyclists, the Echelon bib shorts represent excellence in terms of comfort and performance. Extremely comfortable for both daily use in training and races, these bib shorts are made from elastic and compressive fabric. The Ghost Air Gel chamois pad, crafted from a Premio material with a soft touch, consists of high-density foam and gel inserts. Despite its dense structure, the chamois pad remains incredibly elastic and comfortable, with minimal bulk. The silicone print on the bottom of the leg openings keeps the shorts in the right position even during intense rides. The raw-cut construction of the back panel with laser-cut ventilation holes ensures stability of the shoulder straps and excellent construction comfort. Additionally, the elastic microfiber shoulder straps with proper width offer extra support without causing irritation or discomfort.

Options:

- Logo customization with white silicon material or dark reflex material
- Short color fabric available in navy blue and black
- X-Stra pad
- Core Evo pad

W6510 APEX - Bib shorts - men's

Additional features:

- Comfortable and breathable elastic bibs with raw cut finish
- Ergonomic cut enhanced by the raw cut construction
- X-Stra pad designed and built to offer excellent protection over long distances. Cross-linked foams and injected gel inserts guarantee excellent comfort even after 5 hours. The front mesh insert ensures proper breathability and Premium microfiber fabric offers a touch of softness and ensures fast drying
- The leg bottoms with inner hypoallergenic silicone print provide a gripping function ensuring the leg bottom will remain in the right position
- Customization : The laterally side bands are customizable using sublimation technology

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+18 / +35 °C

Extremely comfortable bib shorts with an optimized fit for your long bike rides. Crafted from highly elastic, compressive fabric that offers an exceptional fit. The matched chamois pad is ideal for long rides, as multiple layers of foam and injected gel inside ensure optimal support. The seamless elastic mesh shoulder straps promote temperature regulation without constriction. The silicone print on the bottom of the leg openings keeps the shorts in the right position even during intense rides. Personalize your Apex bib shorts with your graphics for a distinctive and unique style without compromising the performance of a high-end product.

Options:

- Colour fabric for inner part of the shorts available in navy blue and black
- Ghost Air Gel pad
- Core Evo pad

MEN'S BIB SHORTS

W6550 BASECAMP - Bib shorts - men's

Additional features:

- Cutting-edge and sustainable technological fabric. Made from regenerated ECONYL® Nylon, it's a unique combination of muscle compression and comfort.
- Comfortable elastic shoulder straps with microfiber elastic band
- Total UPF protection (50+)
- Core Evo chamois pad, an excellent proposition in the mid-to-high range, combining foams with different densities to offer cyclists a high-performance product for medium distances
- New silicone elastic grip on the bottom, 7 cm high in microfiber with an aero design
- Customization: Side bands, central back panel, and leg gripper elastics can be customized using sublimation technology

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+18 / +35 °C

These bib shorts have been designed to provide performance and comfort for the demanding cyclist who seeks a product with a high quality-to-price ratio. Equipped with our basic Core Evo chamois pad with medium density, they are suitable for medium distances. However, by choosing among the options, you can have a Basecamp bib shorts suitable even for longer distances. The new 7 cm high aero elastic band with gripping silicone on the bottom provides stability, keeping the position of the shorts stable and correct. Additionally, the elastic microfiber shoulder straps with appropriate width offer extra support without causing irritations or discomfort.

Options:

- Inner part of the bib shorts available in navy blue and black
- Ghost Air Gel chamois pad
- X-Stra chamois pad

MEN'S VESTS

W6007 ECHELON - Windproof vest - men's

Additional features:

- 100 gr/m² breathable, wind & waterproof fabric
- Breathable mesh fabric on the back
- Divisible Vislon zipper with double slider for easy access to the jersey pockets
- Inside silicone strip on the bottom
- The construction of the contoured and elastic sleeve cuffs prevents the passage of air and offers superior comfort and optimal fit

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+12 / +25 °C

A superlight and highly packable outer layer designed for early starts or cold descents. Windproof front panel provides a thin but effective layer of protection. Mesh back panel allows you to ride hard without overheating.

Armholes fit the contours of the shoulders. Can be packed down easily and stowed in a jersey pocket when not in use.

Options:

- Reflex detail on the back

W6513 APEX - Windproof vest - men's

Additional features:

- Water repellent fabric on the front and on the sides
- Breathable mesh fabric on the back with antibacterial treatment
- Full-length concealed Camlock zipper
- Inside silicone strip on the bottom
- 2 back openings for access to jersey pockets

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+12 / +25 °C

The Apex gilet provides protection from the elements when you need it. Made from lightweight fabric. Providing breathable protection, easy access to the jersey pockets.

This gilet aids temperature regulation in a range of multiple conditions with a durable water repellency DWR treatment for water resistance on wet days. The entire garment packs away tightly into jersey pockets. The styling is minimal to ensure the garment is as light as possible.

Options:

- Reflex detail on the back

MEN'S LONG SLEEVED JERSEYS

W6008 ECHELON - Long-sleeved jersey - men's

Additional features:

- 180 gr/m² thermal fabric to protect your body from cold offering a great breathability
- Raw cut cuffs help to block out cold air and helps to take off easily the jersey
- Hidden divisible front zip with self-locking Camlock slider with top and bottom fabric flap to prevent redness and frictions
- 3 capacious and elastic back pockets with shaped construction for easy access to essentials
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+12 / +23 °C

Long-sleeved jersey made with thermal but not overly heavy fabrics. Ideal for cyclists who need to train intensively. The very snug construction allows for good thermal comfort and optimal moisture wicking. The ergonomic raw-cut cuffs provide additional comfort, and the three spacious rear pockets offer sufficient storage capacity even for long rides.

Options:

- Reflex detail on the back

W6512 APEX - Long-sleeved jersey - men's

Additional features:

- 195 gr/m² thermal fabric to protect the body from cold offering a great breathability
- Raw cut cuffs help to block out cold air and rain and to take easily off the jersey
- Hidden divisible front zip with self-locking Camlock slider with top and bottom fabric flap to prevent redness and frictions
- 3 back pockets with inner elastic microfibre tape on the upper edge that makes the pockets safe and guarantees easy and comfortable access
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts

Fitting	■■■■■■■■■□
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■□
Temperature	+10 / +21 °C

Here's the winter jersey suitable for facing extended periods of the fall-spring season. Crafted with comfortable thermal and stretchy fabric, it conforms well to the body, providing good wind resistance while maintaining excellent breathability. Paired with a BL collection gilet, it increases the range of usability. Convenient rear pockets and excellent elastic with silicone at the bottom allow you to maintain great comfort during bike rides.

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

MEN'S LONG SLEEVED JERSEYS

W6017 ECHELON - Water repellent long-sleeved jersey - men's

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+6 / +16 °C

Are you looking for a jersey that can provide you with greater thermal comfort compared to a regular winter jersey? One that guarantees unmatched elasticity and fit? This is the product for you; thermal and protective, even in light rain, thanks to the DWR treatment. Paired with a vest, it allows you to tackle almost the entire winter season.

Additional features:

- 235 gr/m² DWR thermal fabric to protect the body from cold offering a great breathability
- Elasticated cuffs effectively ward off chilly air and rain, ensuring snug warmth while allowing effortless removal of the jersey
- Hidden divisible front zip with self-locking Camlock slider with top and bottom fabric flap to prevent redness and frictions
- 3 capacious and elastic back pockets with shaped construction for easy access to essentials
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

MEN'S THERMAL BIB SHORTS

W6014 ECHELON - Thermal bib shorts - men's

Additional features:

- Mititech thermal fabric with brushed finishing inside, very elastic and highly breathable
- New bib elastic bands on flat microfiber for added comfort and bonded technology allows for a very clean style without causing discomfort or compromising the elasticity
- Bottom elastic gripper on flat microfiber ensuring the leg bottom will remain in position
- Back made with soft fabric with wicking holes: superb stretch, feeling and support
- Ghost Air Gel pad for long distances. The cross-linked foams and injected gel inserts guarantee excellent comfort even after 7 hours.
- Customization: with 2 logos on lateral sides and 2 small logos on inner legs

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+3 / +14 °C

Introducing our top-tier thermal bib shorts, crafted from exquisite Italian material. With new bib elastic bands for added comfort, bonded technology for a sleek style, and a soft, wicking back design offering superb stretch and support.

The Ghost Air gel pad ensures over 7 hours of breathable comfort. Elevate your ride with these elegant and classy shorts.

Options:

- Logo customization with white silicon material or dark reflex material
- Short color fabric available in navy blue and black
- X-Strap pad
- Core Evo pad

W6520 APEX - Thermal bib shorts - men's

Additional features:

- Mititech thermal fabric with a soft inner fleece, highly elastic, and extremely breathable
- Total UPF protection (50+)
- Comfortable and breathable elastic shoulder straps with raw-cut finish
- New 7 cm high aero elastic grip at the bottom in microfiber with an aero design
- X-Strap chamois pad designed and manufactured to provide excellent protection during long distances. The reticulated foams and injected gel inserts ensure excellent comfort even after 5 hours. The microfiber Premio fabric offers a soft touch and ensures rapid drying.
- Customization: Side bands, central back panel, and leg gripper elastics can be customized using sublimation technology

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+3 / +14 °C

The Apex thermal bib shorts will be your best winter companion for the most comfortable rides. Customize the side bands, the rear panel, and even the aero leg grippers using sublimation technique to achieve a unique design. These bib shorts are ideal for rides during autumn and spring when temperatures are cool. They are made with Mititech fabric that provides thermal comfort while ensuring good moisture transport. The seamless elastic mesh shoulder straps allow for temperature regulation without constriction. Conquer the road in style with Apex.

Options:

- Inner part of the bib shorts available in navy blue and black
- Ghost Air Gel chamois pad
- Core Evo chamois pad

MEN'S WINDPROOF JACKETS

W6100 APEX - Windproof jacket - men's

Additional features:

- 100 gr/m² breathable, wind & waterproof fabric
- Reflective elastic tape with inner silicone on bottom for excellent grip and comfort
- Full-length YKK® zipper with double slider for easy access to jersey pocket
- Raw cut cuffs help to block out cold air and rain and to take easily off the jacket
- Collar with tape to better close the shaping around the neck and block cold air

Fitting	■■■■■□
Breathability	■■■■■□
Elasticity	■■■■■□
Temperature	+6 / +18 °C

New packable Apex windproof jacket, designed to protect you during your bike rides. Crafted with super lightweight 100g/m² fabric, it ensures optimal breathability and temperature control during your rides. The water-repellent DWR treatment offers additional water resistance. Discover its exceptional features: an elastic tape with reflective elements on the bottom provides increased visibility even in rainy conditions, the convenient divisible front YKK® zipper with double slider makes it easy to access your jersey pockets, and the raw-cut cuffs along with a well-sealed collar allow you to shield yourself from cold air.

W6553 BASECAMP - Windproof jacket - men's

Additional features:

- Water repellent and windproof fabric
- Extremely elastic fabric on the sides
- Elastic tape on the bottom
- Full-length YKK® Camlock zipper
- Raw cut cuffs help to block out cold air and to take off easily the jacket

Fitting	■■■■■□
Breathability	■■■■■□
Elasticity	■■■■■□
Temperature	+8 / +20 °C

Basecamp lightweight jacket, a reliable companion against wind and light rain. Designed with a DWR treatment, this jacket is intended for temperatures ranging from +8°C to +20°C. The windproof fabric is strategically positioned on the front panel, back, and sleeves to ensure excellent wind protection. The sides, on the other hand, are made from an extremely elastic fabric for added comfort, while the raw-cut cuffs shield from cold air. A divisible front Camlock zipper and an elastic hem at the bottom complete this essential piece for tackling changing weather conditions.

Options:

- Reflex detail on the back

MEN'S RACESUITS

W6012 ECHELON - Printed long-sleeved Chronosuit - men's

Additional features:

- Compressive and fully customizable pants fabric
- Elastic and aerodynamic fabric on the upper body
- Thermotaped finishing on the collar to prevent chafing
- Ergonomic leg construction enhanced by the raw-cut design with internal silicone grip
- Invisible front zipper
- Flap to attach the event number on the back
- Ghost Air Gel pad for long distances. The reticulated foams and injected gel inserts provide excellent comfort even after 7 hours.
- Raw-cut finish with internal silicone grip
- Completely customizable

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+15 / +30 °C

Step into the realm of peak performance with our Echelon Long Sleeve Chrono Body: it's designed for use in time trial competitions where seconds matter. The ergonomic construction of the sleeves, collar, and strategically placed minimal seams enhance aerodynamic efficiency during training and races. The silicone print on the raw-cut leg bottoms keeps the shorts in the right position. The shorts are entirely customizable and made from compressive and elastic fabric, which ensures excellent moisture transport for absolute comfort even during intense rides.

Options:

- X-Stra pad
- Core Evo pad

W6015 ECHELON - Silicon logos long-sleeved Chronosuit - men's

Additional features:

- Shorts fabric made with Brugnoli® Explosive technology: high compression and muscle endurance with a weight of 220 g/m²
- Elastic and aerodynamic fabric on the upper body
- Thermotaped finishing on the collar to prevent chafing
- Ergonomic leg construction enhanced by the raw-cut design with internal silicone grip
- Invisible front zipper
- Flap to attach the event number on the back
- Ghost Air Gel pad for long distances. The reticulated foams and injected gel inserts provide excellent comfort even after 7 hours.
- Raw-cut finish with internal silicone grip
- Fully customizable on the upper part while the lower part can be customized with 2 logos on the sides and 2 small logos on the inner leg.

Enter the realm of peak performance with our Echelon Long Sleeve Chrono Body: it's designed for use in time trial competitions where seconds are crucial. The ergonomic construction of the sleeves, collar, and strategically placed minimal seams enhances aerodynamic efficiency during training and races. The silicone print on the raw-cut leg bottoms keeps the shorts in the right position. The solid color high-compression microfiber shorts maintain excellent moisture transport for absolute comfort even during intense rides; customizable with silicone logos. Compete like a pro.

Options:

- Shorts interior fabric available in navy blue and black
- X-Stra pad
- Core Evo pad

MEN'S RACESUITS

W6024 ECHELON - Silicon logos short-sleeved Chronosuit - men's

CUSTOM TEAM COLLECTION

WOMEN'S SHORT SLEEVED JERSEYS AND BIB SHORTS

W6514 APEX - Short-sleeved jersey - women's

Fitting	■■■■■□
Breathability	■■■■■■■■
Elasticity	■■■■■■■■
Temperature	+18 / +35 °C

Here's your cycling jersey to use during training rides in mild to warm weather conditions.

Open-structured fabric to wick away sweat and promote breathability.

Tight-knit fabric on the back for added sun protection. Raw-cut sleeves for an aerodynamic look.

Additional features:

- Lower collar construction for an optimal fit and seamless internal finish to avoid redness and frictions.
- 3 back pockets with inner elastic microfibre tape on the upper edge that makes the pockets safe and guarantees easy and comfortable access.
- Internal reinforcement in the pocket to avoid breaks on sensitive points
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts
- Hidden divisible front zip with top and bottom fabric flap to prevent redness and frictions
- Raw cut sleeves for improved comfort and performance

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

W6515 APEX - Bib shorts - women's

Fitting	■■■■■■■■
Breathability	■■■■■■■■
Elasticity	■■■■■■■■
Temperature	+18 / +35 °C

Supremely comfortable bib shorts for complete comfort on road rides with an improved overall fit. Made with Thunderbike fabric. Tried and tested X-Stra pad with multiple foam layers for optimal support. High-stretch mesh fabric uppers aid temperature regulation.

Silicone leg grippers hold the shorts in place. Signature styling for those who refuse to choose between performance and style.

Additional features:

- Comfortable and breathable elastic bibs with raw cut finish
- Ergonomic cut enhanced by the raw cut construction
- X-Stra pad designed and built to offer excellent protection over long distances. Cross-linked foams and injected gel inserts guarantee excellent comfort even after 5 hours. The front mesh insert ensures proper breathability and Premium microfiber fabric offers a touch of softness and ensures fast drying
- The leg bottoms with inner hypoallergenic silicone print provide a gripping function ensuring the leg bottom will remain in the right position
- Customization : The laterally side bands are customizable using sublimation technology

Options:

- Colour fabric for inner part of the shorts available in navy blue and black
- Ghost Air Gel pad
- Core Evo pad

WOMEN'S WINDPROOF LONG-SLEEVED JERSEYS and VEST

W6516 APEX - Long-sleeved jersey - women's

Fitting	■■■■■□
Breathability	■■■■■
Elasticity	■■■■■□
Temperature	+10 / +21 °C

Here's the winter jersey suitable for facing extended periods of the fall-spring season. Crafted with comfortable thermal and stretchy fabric, it conforms well to the body, providing good wind resistance while maintaining excellent breathability. Paired with a BL collection gilet, it increases the range of usability. Convenient rear pockets and excellent elastic with silicone at the bottom allow you to maintain great comfort during bike rides.

Additional features:

- Water repellent fabric on the front and on the sides
- Breathable mesh fabric on the back with antibacterial treatment
- Full-length concealed Camlock zipper
- Inside silicone strip on the bottom
- 2 back openings for access to jersey pockets

Options:

- Reflex detail on the back

W6517 APEX - Windproof vest - women's

Fitting	■■■■■□
Breathability	■■■■■□
Elasticity	■■■■■□
Temperature	+12 / +25 °C

The Apex gilet provides protection from the elements when you need it. Made from lightweight fabric. Providing breathable protection, easy access to the jersey pockets.

This gilet aids temperature regulation in a range of multiple conditions with a durable water repellency DWR treatment for water resistance on wet days. The entire garment packs away tightly into jersey pockets. The styling is minimal to ensure the garment is as light as possible.

Additional features:

- Water repellent fabric on the front and on the sides
- Breathable mesh fabric on the back with antibacterial treatment
- Full-length concealed Camlock zipper
- Inside silicone strip on the bottom
- 2 back openings for access to jersey pockets

Options:

- Reflex detail on the back

WOMEN'S SHORT-SLEEVED JERSEYS

W6302 DRAFT - Short-sleeved jersey - women's

Fitting	■■■■■■■■■■
Breathability	■■■■■■■■■■
Elasticity	■■■■■■■■■■
Temperature	+18 / +35 °C

A cycling jersey to wear daily that sets the standard in terms of performance and value. Designed with stretch fabric to provide a snug yet non-restrictive fit. Comfortable and breathable when worn against the skin or over a sporty base layer. Strategically placed shoulder seams prevent fabric from bunching up under the arms.

Additional features:

- Internal reinforcement in the pocket to avoid breaks on sensitive points
- 3 large back pockets with soft upper elastic band for easy access to essentials
- Internal silicone elastic waistband to ensure excellent adherence of the jersey to the shorts
- Hidden divisible front zip with self-locking Cam & lock slider
- Intermediate sleeve length for a modern cycling
- Set in raw cut sleeves for improved comfort and performance

Options:

- Vertical zipped back pocket on right side
- Reflex detail on the back

MEN'S GRAVEL COLLECTION

W7500 G CAVE - Short-sleeved jersey - men's

Fitting	■■■■■
Breathability	■■■■■
Elasticity	■■■■■
Temperature	+18 / +35 °C

Jersey designed for gravel use with high-level product features. Engineered for even extreme gravel riding performance in very hot weather conditions. Highly breathable front section with an open-textured fabric for rapid ventilation in race conditions. Ample loading capacity with a 5-pocket construction optimized for stability and easy access to essential items stored in various pocket compartments. Ergonomic collar and compression fit designed for an aerodynamic position on the bicycle.

Additional features:

- Very light main fabric, soft and breathable that allow a very snug fit and guarantee fast drying
- Open-textured fabric on the side panels and back panel to ensure optimal body temperature even during rides on hot summer days
- Pocket construction BL-PKT01: 5 rear pockets, four of which are open and one particularly large closed with zip. One additional on the side.
- Hidden divisible front zip with self-locking Cam lock slider with top and bottom fabric flap to prevent redness and frictions
- Raw cut sleeve bottom with super comfortable, light fabric
- Silicone gripper at bottom keeps the jersey in place.

W7501 G CAVE - Bib shorts - men's

Fitting	■■■■■
Breathability	■■■■■
Elasticity	■■■■■
Temperature	+18 / +35 °C

The bib short G Cave is ideal for intensive daily use, thanks to the two side mesh pockets and two back pockets, where you can store the essential items for your ride. The straps are made of lightweight, breathable fabric, while the rest of this bib short is made of technical Power Stretch fabric with fewer seams around the waist. The top-of-the-line Ghost Air Gel seat pad offers total support in the saddle. The raw-cut construction of the back panel with laser-cut ventilation holes ensures stability of the shoulder straps and excellent construction comfort.

Additional features:

- The main fabric is made with Thunderbike to offer compression and elasticity
- Exceptional comfort and freedom of movement.
- Total UPF (50+) protection
- Ghost Air Gel seat pad for long distances. The reticulated foams and injected gel inserts guarantee excellent comfort even after 7 hours. The front mesh insert offers excellent breathability
- Breathable mesh panel on the back with two pockets
- Side pockets on the thigh for easy access to essentials
- New elastic silicone grip at the bottom, 7 cm high, in microfiber with aero design
- Customization: sublimation of the bottom leg elastic

Options:

- Shorts fabric available in navy blue and black colors
- X-Stra seat pad
- Core Evo seat pad

The IMOLA S3 baggy shorts are the right shorts for mtb rides. They are made with a very elastic and comfortable fabric that favors every movement on and off the saddle. The fabric has UPF 50+ total sun protection.

Additional features:

- Snap button closure and zippered fly
- Front zip 16 cm
- Two zippered cargo pockets
- 45 mml. elastic back band to ensure a perfect and comfortable fit
- Reflective elements to increase visibility to keep you safe

UNISEX GRAVEL UNDERWEAR

BL45111 SEGRETO S2 - Padded boxer - UNISEX

TOURER pad

Padded cycling underpants in black with Tourer pad for medium duration routes. Seamless, elastic and comfortable fabric for an underwear to be worn under wide mtb pants or other pants for bike rides.

Additional features:

- Quick drying
- Minimal thickness
- High breathability
- Seamless technology
- Unisex

TOURER pad (Berenis)

TOUCH fabric with a soft hand, micro-channel structure and fast drying. The structure allows moisture to be dispersed quickly, with good drying times.

Covered foam and insert: COMFORT 65 Kg/m³. Soft and elastic polyurethane foam for comfort in contact with the body, elastic for a good fit when worn and with good lift.

Suitable for medium/short distances.

BL45112 SEGRETO S2 - Padded boxer - UNISEX

ALL MOUNTAIN pad

Long-distance cycling underwear with pad for both cycling and mtb. Made of seamless and very elastic fabric, the SEGRETO S2 boxer is also very breathable and soft. Great to wear under trousers or baggy shorts.

Additional features:

- Quick drying
- Minimal thickness
- High breathability
- Seamless technology
- Unisex

ALL MOUNTAIN pad (Berenis)

High-performance pad made with PREMIO fabric with a very soft hand and very fast drying. The 65 Kg/m³ COMFORT covered foam is a soft and elastic polyurethane foam for a good fit when worn and with an increased hole of 5mm in diameter which increases the passage of air and the drying of the surface. The PRO EVO 100 Kg/m³ insert foam, with 10 mm thick with ROOTED GEL ischial inserts guarantee great support and protection on long distances.

Suitable for long distances.

002 WHITE

001 BLACK

Additional features:

- Cuff 10 cm
- Skinlife® fabric. Made in Italy
- Antibacterial treatment
- Breathable mesh construction
- Elastic cuff
- Socks with elastic fibers to keep the foot stable
- Imperceptible toe seams
- Sizes: XS (35-37), S (38-40), M (41-43)

Cycling socks for women made in Skinlife® that offer absolute softness, comfort and freshness with rapid evaporation of moisture. The presence of silver in the fabric eliminates annoying electrostatic charges and allows the reduction of odors, maintaining the natural balance of bacteria present on the skin.
